

# BIBEON — PACKAGING PROGRAMME · REQUEST

Made in France · August 2026 · three items, one document

**WHAT WE ARE LOOKING FOR, IN ONE SENTENCE.** An IVORY packaging family — ivory inside and outside — built around one idea: the bottles must be seen, standing upright, the second a box is opened. We are not asking anyone to invent a structure. We are asking which of these you already make, and we will adapt to your standard tooling.

## THE THREE ITEMS

**ITEM 1 — THE GIFT BOX FOR THREE BOTTLES.** Around **230 × 175 × 152 mm inside**. Three shapes suit us — see page 4. Three bottles standing upright in a paper insert, plus a folded cotton pouch, a leaflet and a label sheet.

**ITEM 2 — THE SLEEVE.** A collar of **68 × 68 × 70 mm**, open at the top and at the bottom, wrapped around each bottle so the cap and ring stay visible. **Three per gift box**. See page 5.

**ITEM 3 — THE SINGLE BOTTLE BOX, WITH A WINDOW.** **100 × 100 × 120 mm inside**, one bottle standing on a raised deck, the accessories hidden underneath, and a **56 × 64 mm window** on the front face. See page 5.

## THE PRODUCT

A bottle: **Ø 65 mm at the base, Ø 46 mm at the top, 98 mm high, 35 g complete**. A truncated cone with a screw cap. **Please make your dummy from these figures only** — do not use any existing bottle as a reference, ours is not a standard shape. Dimensioned drawing on page 3.

## WHAT WE NEED FROM YOU, IN THIS ORDER

1. Do you **already make** something close to any of these? If yes, send it — that is the fastest answer and probably the best one.
2. Your **MOQ**, per item. Please do not discard our enquiry because a first order is small.
3. Your **structural drawing**, dimensioned.
4. A **3D visual or rendering** — the box closed, and the box open with the bottles standing inside.
5. **Photographs of your ivory paper swatches**, in daylight — see the material section, page 6. This one matters a great deal to us.
6. **Unit price** per item, at your MOQ and at 1,000.
7. **Air and sea freight**, delivered to 03100 Montluçon, France.
8. **Sample cost and lead time**. We will only order a physical sample once the drawing and the price are agreed — **we work on screen first**.

## WE ARE FLEXIBLE ON EVERYTHING ELSE

Exact dimensions. Glue. Assembly method. Board grade and grammage. Solid board or corrugated. The closure. The way the insert is built. **Tell us what you would normally do**.

**THE ONLY THING THAT IS NOT NEGOTIABLE.** The bottles must be seen, standing, the second the box is opened — a lift-off lid, or a front panel that folds down. A box that opens only at the ends hides them, and then the box is pointless. Everything else is open to discussion.

Suzanne de Bégon · Founder · BIBEON · 03100 Montluçon, France · [www.bibeon.fr](http://www.bibeon.fr)

**1. FERMÉ / CLOSED**  
VUE 3/4

**2. OUVERT / OPEN**  
VUE 3/4

INSERT COMBLE  
LA ZONE PENTÉE :  
ZÉRO VIDE

**3. INSERT INTÉRIEUR – RÉOLUTION DU VIDE TRIANGULAIRE**

L'insert épouse parfaitement la pente arrière du coffret pour supprimer toute zone vide et protéger les biberons.

**4. COMPOSITION MODULAIRE – FORMAT UNIVERSEL 3 BIBERONS**

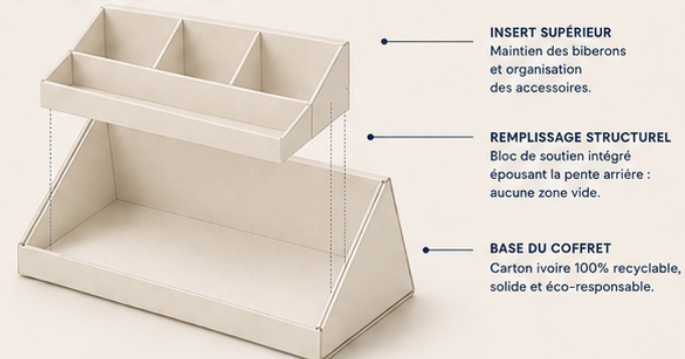

**3 EMPLACEMENTS SÉCURISÉS**  
Maintien vertical et protection optimale des biberons.

**POCHON**  
Pour transporter et protéger en toute simplicité.

**NOTICE PLIÉE**  
Guide d'utilisation clair et accessible.

**AUTOCOLLANTS**  
Pour personnaliser et identifier.

**5. VUE ÉCLATÉE / EXPLODÉE**

**INSERT SUPÉRIEUR**  
Maintien des biberons et organisation des accessoires.

**REPLISSAGE STRUCTUREL**  
Bloc de soutien intégré épousant la pente arrière : aucune zone vide.

**BASE DU COFFRET**  
Carton ivoire 100% recyclable, solide et éco-responsable.

**MATÉRIAU NATUREL**  
Carton ivoire 100% recyclable.

**PROTECTION OPTIMALE**  
Conception étudiée pour sécuriser les biberons et accessoires.

**EXPÉRIENCE PREMIUM**  
Ouverture élégante et présentation soignée des essentiels.

**CONÇU EN FRANCE**  
Designé avec soin, fabriqué avec exigence.

## BIBEON PROJECT

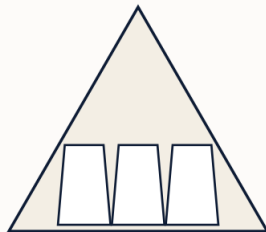

**Safety envelope: Ø70 base · Ø50 top · 102 high.**  
**Tolerance is already included — please do not add tolerance a second time.**

## 2 · THREE SHAPES — all acceptable. Tell us which one you already make.

These are intentions, not diecut files. We adapt to your standard sizes and to your standard opening.

### A — THE TRIANGULAR PRISM

« tobleron box »

side 175 · length 230 · height 152

**Several factories already sell this shape.**

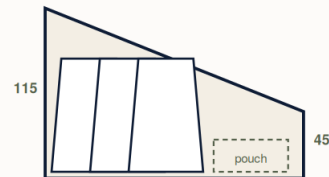

If you do, tell us your maximum size.

**It must not open at the ends.**

A front panel folding down, or a tear strip — whichever your tooling does.

### B — THE WEDGE

« counter display box » — our preference

depth 175 · length 230

**Flat base, high vertical back, sloping top,**

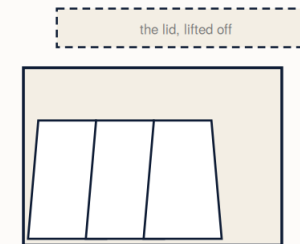

low front. The bottles stand against the back;  
the accessories lie in the low front.

**No wasted apex, and the bottles are seen**

without any special closure. This is the  
shape we would choose first.

### C — THE RECTANGLE

rigid lift-off box, folding carton or mailer

around 230 × 120 × 120 — your standard size is fine

**The simplest of the three, and the cheapest.**

Every factory makes it.

**This is our fallback, and it is a real one.**

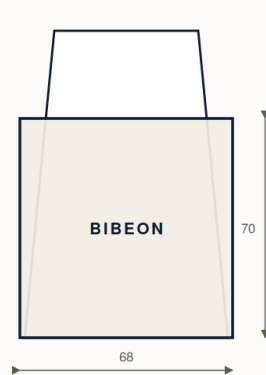

If neither the triangle nor the wedge exists  
in your range, quote this instead.

## 4 · THE SLEEVE AND THE SINGLE BOTTLE BOX

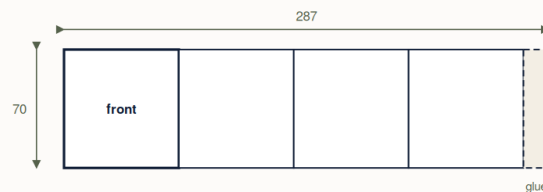

All dimensions in millimetres, inside.

### ITEM 2 — THE SLEEVE

open at the top AND at the bottom · no lid, no base

the cap and the ring stay fully visible

**FLAT BLANK 287 × 70 — four panels of 68 + a 15 mm glue flap.**

Glued on one vertical seam, delivered flat.

**Printing: front panel = logotype + signature.**

One side panel = a small bottle pictogram.

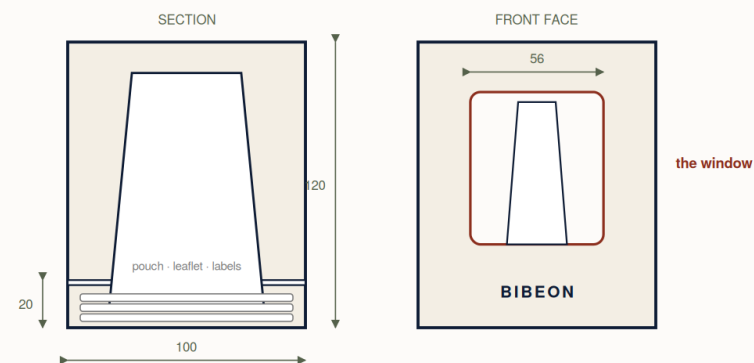

The two other panels stay blank. Nothing inside.

The bottle is a cone: the sleeve surrounds it, it does not grip.

Three sleeves per gift box.

### ITEM 3 — THE SINGLE BOTTLE BOX, WITH A WINDOW

inside 100 × 100 × 120 — a raised deck, a hidden compartment, a window on the front

**A true 10 cm cube is NOT possible with the deck: the bottle would reach 107 mm.**

120 mm high is the smallest that works — it leaves 13 mm of air above the cap and 18 mm of clear space under the deck, over a 96 × 96 footprint.

**THE WINDOW — 56 × 64 mm, centred on the front face.**

We would prefer an OPEN aperture, with NO plastic film, to stay all-paper.

Please quote the box three ways: no window · open aperture · with a clear film, and tell us which film you would use.

# MATERIAL, PRINTING, CLOSURE — common to the three items

This page applies to ITEM 1, ITEM 2 and ITEM 3 alike.

## THE MATERIAL this is the part we care about

**IVORY, inside and outside.** Not kraft, not brown, not white printed to look ivory. A warm off-white, close to #F3EEE4.

**Uncoated and matt.** What we are after is a **mineral, slightly cloudy surface where the fibre shows** — the look of an **uncoated textured fine paper** (the family of Fedrigoni Materica, Gmund, Favini Crush), laminated onto board. A smooth coated board will not give this.

**Please tell us which textured or special papers you actually hold in stock, and send photographs of your ivory swatches in daylight.** We will choose the final material from what you really have — we are not asking you to source a European paper.

Acceptable fallback: **uncoated ivory board, dyed through, 300–350 g/m<sup>2</sup>.**

**Never:** plastic lamination film, gloss varnish, foil, soft-touch film.

## STRUCTURE

**Solid board or corrugated — whichever you make.** A rigid lift-off box, a folding carton, or E-flute with an ivory liner on both faces. All three are acceptable.

If the board is delicate, the box may travel inside an outer mailer or kraft envelope — tell us if you supply one, and quote it. **We want the total cost, not only the box.**

## PRINTING

**One colour only, outside** — navy #0E1C35. Nothing printed inside. Print-ready vector artwork supplied, in outlines. Please also quote each item **unprinted**.

**No varnish anywhere.** The matt paper must stay matt.

## THE INSERTS

Paper only, made **however you normally make inserts** — die-cut tray, slotted pieces, glued or not. **No foam, no plastic, no thermoformed tray, no magnets.**

Where an insert is a raised deck, please die-cut **two small finger notches** so it can be lifted out by hand. Without them the box feels cheap.

## CLOSURE

A **round transparent seal sticker, Ø 30 mm, low tack**, bridging lid and base, applied at packing. It must **not tear or mark uncoated paper** when removed — please confirm your adhesive is suitable for uncoated textured board, and leave a **small non-adhesive tab** on one edge so it can be lifted by hand.

Please also quote an **ivory paper seal** of the same size as an alternative.

**No magnets** — they end the all-paper recyclability.

## QUANTITIES

**ITEM 1, gift box:** 300 / 500 / 1,000 / 2,000.

**ITEM 2, sleeve:** 500 / 1,500 / 3,000 — three per gift box.

**ITEM 3, single box:** 300 / 500 / 1,000 / 2,000.

**And in every case, tell us your own MOQ first** — we will work with your number.

**HOW WE WOULD LIKE TO WORK.** Your structural drawing first, then a 3D visual, then the price. We confirm on screen, within hours. A physical sample is ordered only once the drawing and the price are agreed — and then one shipment only, by express courier, quoted separately.
